# Bicycle Cable Lock

## Instructions for Setting your Combination Lock

1. Open the lock by aligning the preset combination number to the Guide Point and pull out the Lock Post (Figure 1). The lock combination is preset to "0 0 0 0".

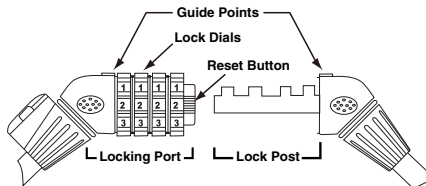

Figure 1

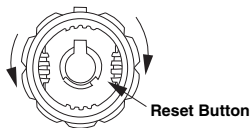

Figure 2

2. Turn the Reset Button clockwise 90° (Figure 2).
3. You are ready to turn the Lock Dials to set your secret combination, such as phone number, birthday, etc.
4. After setting your secret combination, turn the Reset Button counter-clockwise 90°.
5. Verify your new combination before your using the lock. Insert the Lock Post all the way into the Locking Port but do not turn the dials. Pull out the Lock Post. Your lock is ready to use.
6. The reset operation is now complete. Repeat step 1-5 anytime you wish to change your secret combination.

I set my combination to:
